WORK EXPERIENCE

WUBSHET (CLIENT)

Addis Ababa, Ethiopia

Full-Stack Developer, Pedal Delivery App

March 2026 - September 2026

- Built the full delivery application solo in 6 months, from design to deployment on the Google Play Store.
- Developed one mobile app with separate customer and driver sign-in interfaces using React Native, Google Maps, Golang, and MongoDB.
- Built an admin website where admins assign drivers to orders and monitor each driver's live location and online status.

SELECTED PROJECTS

Pedal Delivery | Full-Stack Developer

React Native • Google Maps • Golang • MongoDB

- Built a food delivery app for Bahir Dar where customers discover local restaurants, order meals, and get them delivered.
- Integrated local payment options including TeleBirr, CBE bank transfer, and cash on delivery.

Hulu Service | Full-Stack Developer

Telegram Mini App • Mobile App • Admin Site

- Built a local service marketplace for booking electricians, plumbers, cleaners, and tutors in Amharic or English.
- Delivered the product across a Telegram mini app, a mobile application, and an admin site, with direct APK distribution.

YOVA | Full-Stack Developer

Mobile App • AI Assistant • Blog Site

- Built a virtual assistant app that brings schedule, notes, tasks, and an AI assistant onto one dashboard.
- Published a build-log blog site documenting the development process.
